Activity
REPORT
Session 2024-25

LRRC - A Journey of Healing and

நலமும் நம்பிக்கையும் - தொழுநோய் நிவாரண ஊரக மையத்

1956

"Born of Compassion"

In Early 1950s
Most Rev. V.S. Selvanather,
Bishop of Salem, encounters
leprosy patients during
pastoral visits; deeply moved
to respond. He founded
LRRC in 1956.

1961

- Arrival of
Dr. Elisabeth Vomstein
(Germany),
a turning point
for LRRC's medical
development.

1967

- First reconstructive
surgery (drop foot)
performed by
Dr. Ernest P. Fritsch.
Foundation stone laid
by **Rev. J.R. Knox**
for 60-bed hospital.

1980

1980s-2000s
- Expansion of surgical
sessions, rehabilitation,
footwear, weaving,
poultry, and agricultural
support.

"Healing through
Science" -
First reconstructive
surgery in 1967.

1956 & 1958

"Strengthened by Service"

Bishop Selvanather,
Chaiman of Salem
Diocese Society invited
Ms. Marie Denis, a French
Nurse who started a clinic
at R.C.Chettipatty under a
thatched shed in 1956.
A small dispensary was
built and inaugurated
by Mr. Manickavelu,
Health Minister of TN;
blessed by
Bishop Selvanather
in 1958.

1976

- Orthopedic Splint
Workshop inaugurated;
serves leprosy and
polio-affected patients.

1970

- New hospital
inaugurated with German
support (Misereor, GLRA,
Sternsinger).
Facilities expanded
for surgery, physiotherapy,
rehabilitation.

and Hope

தின் வரலாற்றுப் பயணக் குறிப்புகள்

1999

1999–2000 – St. Joseph General Hospital started with Maternity, Orthopaedics and Ophthalmology departments.

“Growing in Partnership” – German agencies supported hospital for Leprosy Relief Service.

Partnership with GLRA-Germany since.....

2022

Award Received from Govt. of Tamil Nadu for TB Project

2021

– Community Hall constructed

2023

Operation Theatre Renovated

“Restoring Dignity” – Over 22,000 patients cured; leprosy incidence nearly eliminated.

- Till date – Over 22,000 leprosy patients cured; incidence reduced from 40/1000 to <1/10,000.

- Recognition – LRRC is a DPMR institution for reconstructive surgery in 6 districts (Salem, Namakkal, Erode, Coimbatore, Dharmapuri, Krishnagiri).

Dr. Elisabeth Vomstein – A Torchbearer of Healing

The real growth of LRRC began with Dr. Elisabeth Vomstein, a German national who arrived at R.C. Chettipatty in January 1961. She dedicated her life to the care of the leprosy-affected, expanding the hospital with the support of the Bishops of Salem, donors, and the GLRA, Germany. For 40 years, she served as Secretary and Superintendent, shaping LRRC’s mission with vision and compassion. Patients lovingly called her “Amma”, remembering her tender touch and motherly care. She dressed their wounds, restored their dignity, and became to them the face of Christ’s mercy. After returning to Germany, she spent her last years in an orphanage and passed away in 2017, blessed with 100 years of life.

Those who live for others never die – and she remains a shining example of that truth.

LRRRC REGULAR ACTIVITIES

தொழுநோய் நிவாரண ஊரக மையத்தின் பொதுவான செயல்பாடுகள்

KEY SERVICES OF LRRRC

1. Early Detection :

Conducting skin camps to identify new leprosy cases.

2. Medical Care:

Providing free treatment to leprosy-affected individuals.

3. Surgical Support:

Offering free reconstructive surgeries.

4. Welfare Activities:

Organizing various programs for the well-being of leprosy patients.

5. Rehabilitation:

Running a rehabilitation home for affected persons.

6. TB Treatment:

Managing tuberculosis patients in association with the Government of Tamil Nadu.

7. Education & Training:

Offering internships and orientation programs to paramedical students.

SKIN CAMPS CONDUCTED BY LRRRC

இலவச தோல் மருத்துவ முகாம்கள்

For the early detection of leprosy, measures were undertaken across Salem district, particularly in Omalur, Kadayampatti, and Mettur taluks.

Awareness programs were organized for the general public, especially poor people and farmers, who often lacked knowledge or awareness about the disease and acted carelessly.

These initiatives were carried out with the support of local panchayat leaders, in collaboration with the Deputy Director (Leprosy Services), Salem District through skin medical camps.

ஆரம்ப நிலையிலேயே தொழுநோயை கண்டறிய நடவடிக்கைகள் மேற்கொள்ளப்பட்டன. பொதுமக்களுக்கு, குறிப்பாக ஏழை மற்றும் எளிய மக்களுக்கு விழிப்புணர்வு ஏற்படுத்தும் வகையில் முகாம்கள் நடத்தப்பட்டன. இவை உள்ளூர் பஞ்சாயத்துத் தலைவர்களின் ஆதரவுடன், இணை இயக்குநர் (தொழுநோய்ப் பணிகள்) மற்றும் சேலம் மாவட்டத்துடன் இணைந்து தோல் மருத்துவ முகாம்கள் ஆகும்.

LEPROSY NEW CASE DETECTION

புதிய தொழுநோயாளர்களைக் கண்டறிதல்

Case detection through OPD Consultations & Voluntary Reporting at Hospital.

வெளிநோயாளர் பிரிவு வழி நோய்க் கண்டறிதல்

New cases of leprosy were detected through OPD consultations and voluntary reporting at the hospital. These efforts highlight the continued importance of hospital-based services in identifying cases early and providing timely treatment.

Nerve Function Assessment

நரம்பு செயல்திறன் பரிசோதனை வழியாக தொழுநோய்க் கண்டறிதல்

Regular Nerve Function Assessments (NFA) were carried out for leprosy patients to monitor disability status, prevent further complications, and ensure timely medical intervention. This systematic evaluation helps in preserving mobility and improving the quality of life of the patients.

Skin Disease and Leprosy Diagnosis

தோல் நோய் வழியாக தொழுநோய்க் கண்டறிதல்

All types of skin disease cases are routinely attended to at our OPD. Suspected or new cases showing cardinal signs of leprosy are carefully diagnosed through a systematic assessment, including skin examination, nerve examination, and bacteriological tests. This ensures accurate diagnosis and timely initiation of treatment.

TREATMENT AND FOLLOW-UP CARE

சிகிச்சை முறைமை மற்றும் தொடர் கண்காணிப்பு விவரங்கள்

MDT TREATMENT FOR THE DETECTED CASES MONITORING AND FOLLOW UP

தொழுநோயால் பாதிக்கப்பட்டவர்களுக்கு வழங்கப்படும் சிகிச்சைகள் மற்றும் தொடர்க் கண்காணிப்பு

Treatment and Follow-Up

சிகிச்சை மற்றும் தொடர்புக் கண்காணிப்பு

Once a new leprosy case is detected, the first dose of MDT is usually administered by LRRCC, while consecutive doses are provided by the Government NMS. All UT cases are regularly followed up, re-assessed, and subjected to nerve function assessment during every visit.

After completing the prescribed course of treatment, patients are formally declared Released from Treatment (RFT), ensuring proper closure and documentation of their treatment journey.

No. of Cases under treatment

35

RFT Cases – Follow-Up & Counselling

சிகிச்சைகளிலிருந்து விடுவிக்கப்பட்ட நோயாளிகள் - கண்காணிப்பு + உளவியல் ஆலோசனை

Patients who have been declared Released from Treatment (RFT) are not left unattended. Regular follow-up and counselling sessions are conducted to monitor their health status, address residual complications, and provide psychological support. This continued care helps patients regain confidence, reintegrate into society, and maintain their quality of life.

Skin Smear Examination

தோல் திரவப்பரிசோதனை

Skin smear examinations are routinely carried out for suspected leprosy cases to confirm diagnosis and classify the type of disease. This laboratory procedure provides reliable evidence for initiating the correct treatment regimen and monitoring the progress of patients under therapy.

● Reaction & Neuritis Management

நரம்பு பாதிப்பு, நோய் எதிர்ப்பு அழற்சிக்கான சிகிச்சை மற்றும் பராமரிப்பு

Some leprosy patients experience reactions and neuritis before, during, or even after treatment. These conditions are managed with steroid therapy, anti-inflammatory, and analgesic medicines.

In cases where patients develop disabilities such as claw hand or foot drop, they are admitted as inpatients and provided with specialized physiotherapy to restore function and prevent further complications.

PREVENTION OF DISABILITY CAMP

• ஊனத்தடுப்பு முகாம் மற்றும் நலத்திட்ட உதவிகள்

A Prevention of Disability Camp was organized on 2nd October 2024 at the LRRC Rehabilitation Centre in association with the Vincent de Paul Society of Infant Jesus Cathedral Parish, Arisipalayam. The camp was attended by 100 patients (both old and new) with various deformities.

During the camp, participants were guided on self-care practices, and groceries and welfare assistance were provided to support their well-being. The Spiritual Director of the Vincent de Paul Societies of Salem Diocese, Rev. Fr. M. Christuraj graced the occasion as the Chief Guest and Fr. Sathyaseelan, Asst. Parish Priest of Infant Jesus Cathedral as Guest of Honour.

Fr. Vimal, Director of LRRC, felicitated and expressed his heartfelt gratitude to the Office Bearers of the Vincent de Paul Society, Infant Jesus Cathedral, Arisipalayam, Salem, for their generous support in sponsoring the camp.

RECONSTRUCTIVE SURGERIES

• மறுசீரமைப்பு அறுவை சிகிச்சைகள்

- ◆ Free Reconstructive Surgeries (RCS)
- ◆ The LRRC Rehabilitation Centre is an authorized centre to conduct Reconstructive Surgeries (RCS) for patients referred from seven districts (five DDLs). Patients with correctable deformities such as claw hand, foot drop, and lagophthalmos are surgically corrected at our centre four to five times a year.
- ◆ LRRC has signed an MoU with Karigiri Hospital, Vellore, through which Dr. Jerry Joshua and other surgeons from GLRA visit regularly to perform these surgeries. The centre also takes complete and lodging facilities before and after surgery.

WELFARE ASSISTANCE

நலத்திட்ட உதவிகள்

Visit by St. Joseph Matric. Hr. Sec. School

On 30th November 2024, the staff and students of **St. Joseph Matric. Hr. Sec. School, Gugai**, run by the **Sisters of St. Joseph of Cluny**, visited the inmates of the LRRC Rehabilitation Centre. They generously distributed groceries, blankets, and daily essentials to **20 beneficiaries**.

Special thanks to **Sr. Jancy**, Principal of St. Joseph Matric. Hr. Sec. School, for continuing this annual contribution to support the poor patients.

Welfare by LRRC

On 26th December 2024, the **Leprosy Relief Rural Centre (LRRC)** organized a **welfare distribution programme** for the inmates.

A total of **50 beneficiaries** received dhotis and sarees as part of this initiative.

The contribution of LRRC continues to bring relief and dignity to the lives of poor patients through such compassionate outreach.

Visit by Holy Cross Hr. Sec. School

On 30th December 2024, the **staff and students of Holy Cross Hr. Sec. School, Salem**, sponsored a distribution programme at the LRRC Rehabilitation Centre. A total of **40 beneficiaries** received groceries, blankets, and daily essentials.

Every Christmas, **Bro. Sesuraj CSC**, Principal of Holy Cross Matric. Hr. Sec. School, Ammapet, Salem, generously remembers the poor and leprosy-affected by offering dresses, toiletries, snacks, rice bags, and other necessities. His continued support and personal visits bring joy and dignity to our inmates.

WELFARE ASSISTANCE

நலத்திட்ட உதவிகள்

Socio-Economic Assistance – Skill Development Training

சமூக பொருளாதார மேம்பாட்டு உதவி – திறன் வளர்ப்புப் பயிற்சி

With the generous support of GLRA, the LRRC Rehabilitation Centre extended socio-economic assistance to promote self-reliance and dignity among its beneficiaries. Under this initiative, skill development support was provided through the distribution of:

Sewing
Machines

3

Electrical
Tools

1

Mechanical
Tools

INCLUSIVE HEALTHCARE INITIATIVE

மாற்றுத்திறனாளர்களுக்கான மருத்துவ முகாம்

On 26.10.2024, St. Joseph Speciality Hospital, Omalur, in association with the Salem District Association of the Differently Abled, organized a Medical Camp for the Differently Abled across Salem District.

His Excellency Most Rev. Dr. A. Rayappan, Bishop of Salem, was the Chief Guest, and Dr. R. Brindha Devi, District Collector of Salem, was the Special Guest for the occasion.

Around 200 differently abled persons with various ailments attended the camp. A team of specialists—including a General Physician, Orthopedician, Ophthalmologist, Gynecologist, Dermatologist, and Dentist—offered consultations. Free lunch was served to all participants.

The camp was organized in response to the request made by Dr. Athianna, President of the Salem District Association for the Differently Abled, during the AGM of LRRC, to conduct an exclusive health camp for this community.

The gracious presence of the District Collector was truly encouraging and enriched the program.

Special Thanks to Frs. Lucas Thumma, Solomon Raj, Joseph Paul Raj, Arul Sundar for the encouraging presence and support.

OBSERVATION OF ANTI-LEPROSY DAY

• தொழுநோய் ஒழிப்பு தினம் அனுசரித்தல்

Anti-Leprosy Day was observed on 30th January 2025 at LRRC. **Mr. Dhandapani**, Administrative Officer of LRRC, was the Chief Guest for the program.

Students from SKS Nursing College actively participated in the event. **Mr. Arockiasamy**, **Mr. Andrews**, and **Mrs. Stella**—our project staff—created awareness among the students about leprosy and the ongoing activities of LRRC towards its elimination.

The program concluded with the participants taking a pledge to support the fight against leprosy.

HOLY INNOCENTS' DAY CELEBRATION

• 45 மாற்றுத்திறனாளி குழந்தைகள் மற்றும் அவர்களது பெற்றோருக்கு நலத்திட்ட உதவிகள்

முனை முடக்குவாதத்தால் பாதிக்கப்பட்ட குழந்தைகளுடன் கிறிஸ்துமஸ் பெருவிழா

On 30th December 2024, Holy Innocents' Day was observed at the premises of St. Joseph Hospital.

As a tradition, children affected by cerebral palsy are provided subsidized treatment and physiotherapy. Every year, during the Christmas Octave, these children are invited along with their parents to celebrate Christmas in a meaningful and joyful way.

This year, 45 differently abled children and youth participated in the celebration. Various games and competitions were organized, and prizes were distributed. Each child received Christmas gifts and enjoyed a delicious festive lunch, creating an atmosphere of family unity and joy.

Parents expressed their gratitude to LRRC for organizing a program exclusively for their children. They shared that such celebrations motivate them to accept the challenges of caring for their children—whom they cherish as God's special gifts.

ACTIVITIES OF THE PHYSIOTHERAPY DEPARTMENT

முடநீக்கு சிகிச்சை மையத்தின் செயல்பாடுகள் விவரம்

The Physiotherapy Department at LRRC provides a wide range of services for patients of all ages, including exercise therapy, neurodevelopmental therapy, electrotherapy, POP, and splint application for various disabilities.

All congenital, orthopedic, and neurological impairments are regularly treated, with individualized care plans for each patient. The department is well-equipped with modern instruments and apparatuses, and features a spacious area for walking and mobility training, ensuring comprehensive rehabilitation for children, adults, and elderly patients alike.

Physiotherapy – Success Story : Mr. Selvaraj

Mr. Selvaraj, who has served the Diocese for over three decades in the Pastoral Centre and Bishop's House, suffered a severe fall resulting in multiple injuries, including head and hand trauma. After undergoing surgery, he received physiotherapy treatment at LRRC.

When he first arrived at St. Joseph Hospital, he was bedridden, but through regular physiotherapy sessions, he made a remarkable recovery. Today, he can walk independently and drive a vehicle, demonstrating the effectiveness of the hospital's rehabilitative care.

FUTURE PLANS FOR OUR HOSPITAL

எதிர்காலத் திட்டங்கள்

Renovation of Maternity Ward

The demand for maternity care is steadily increasing. Our present maternity ward, constructed decades ago, is inadequate for present-day needs. The rooms are obsolete and lack modern facilities. Our gynaecologist has been persistently requesting renovation so that safe, dignified, and modern care can be provided to mothers and newborns. Renovating this ward with updated infrastructure, better hygiene, and patient-friendly design is an urgent priority.

Renovation of LRRC Rehabilitation Home

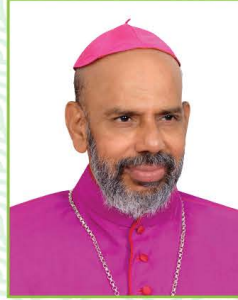

The LRRC rehabilitation home, built long ago, is in dire need of repair. The inmates' rooms are small and congested, with water seepage, peeling plaster, and worn-out concrete flooring. The building is no longer suitable for decent habitation. Renovation will not only restore dignity to our long-term inmates but also enhance the healing environment that is central to rehabilitation and care.
